

The Recycling Station

The Association pays for each kg of garbage that is collected. The cost of Organic Garbage is lower than that of General Garbage. By sorting the waste that can be recycled we can further reduce the cost for the association and its members, i.e. you!

Most of your garbage and waste can be disposed here (**Swedish signs in blue**).

- General household garbage - **Hushållsavfall ej organiskt**
- Organic garbage from food (in special paper sacks) - **Matavfall**

Other waste can be sorted and recycled into the following categories

- None-colored glass, bottles and jars - **Ofärgat glas**
- Colored glass, bottles and jars - **Färgat glas**
- Metal jars and other metal packaging - **Metallförpackningar**
- Plastic packaging and bags - **Plastförpackningar**
- Paper packaging and bags - **Pappersförpackningar**
- Batteries, car batteries excluded - **Batterier**
- Light bulbs – **Glödlampor**
- Fluorescent tubes - **Lysrör**
- Small electric devices – **Elektronikavfall**

Newspapers and other printed material should be placed in the container outside of the Recycling Station close to the garage entrance.

Old appliances (refrigerators, stoves etc) must not be left in the Recycling Station or in the Container room. They have to be transported to a Recycling Center, the closest one is Hagby Recycling Center in Täby.

Thank you for doing your part to reduce the waste of our assets and saving money for the Association!

The Board of the Association (Bostadsrättsföreningen Sjöhästen)
